

Inntel Ltd is a specialist provider of venue and travel solutions to the corporate market. As an organisation that provides a service to its clients, we strive to ensure we offer a quality service at all times and demonstrate a commitment to continually improve the service offered to clients in accordance with their requirements. In line with our company objectives we are continually looking to improve the effectiveness of our QMS and EMS.

Concern for the environment and promoting a broader sustainability agenda are also areas that Inntel takes very seriously. Our impact on the environment stems largely from our office-based operations and we believe that managing the implications of our activities is an integral part of good management practice and responsible corporate governance.

We aim to follow and promote good sustainability practice, to reduce the environmental impacts of all our activities and to help our clients and partners do the same.

Inntel is committed to applying the following principals to its activities:

- Establishing clearly defined objectives and targets that address the environmental and sustainability issues relevant to the company's operations so as to ensure continual improvement in environmental performance.
- Complying with the entire applicable legal requirements and other requirements to which Inntel subscribes which relate to its environmental aspects.
- Preventing pollution and reducing the consumption of resources wherever practical and appropriate.
- Ensuring that all policies and management systems put into place to manage the environmental and sustainability implications of our activities are communicated to all persons working for or on behalf of the organisation, and available to the public.
- Establishing and maintaining effective management systems to control identified risks.

These commitments are documented, implemented and maintained by the Board of Directors of the company and its Management team, and this policy will be reviewed on a regular basis and revised as appropriate.

Our CEO, Douglas O'Neill is responsible for the quality of all Inntel's services, including the environmental system and ensures that the principles of ISO9001 and ISO14001 are followed and maintained by all employees of Inntel and companies to which Inntel may from time to time sub-contract work to on Inntel's behalf.
